SL161

The essentiel fire

Available in four models and two sizes, s16 are perfect for wood heating enthusiasts. Their minimalist design showcase the flames, providing an unparalleled experience.

insert

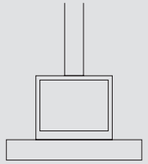

appliance to be inserted into an existing masonry hearth

s[16]in p.5

stoves

freestanding appliance that does not need any finishing

s[16]cube p.17

s[16]H p.25

fireplace

appliance to be installed in a wall

s[16]Z p.33

The s16 are designed to produce the maximum amount of heat while simultaneously ensuring that it emits a minimal quantity of particulates into the atmosphere.

s[16]in

58

68

The s16-in is a wood-burning fireplace insert designed for installation in an existing masonry hearth. It meets current wood heating requirements while preserving the charm and authenticity of fireplaces of yore.

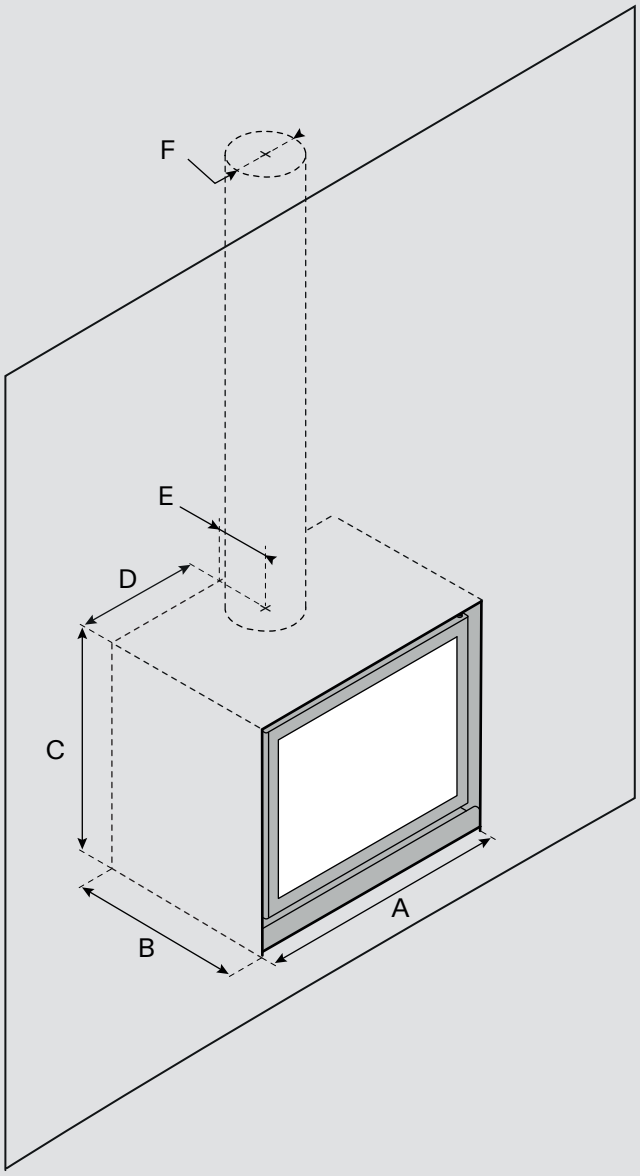

Performances

Fine particle emissions	1.5 g/h	1.9 g/h
Wood consumption	4.2 lb/h	4.2 lb/h
Efficiency (EPA)	70 %	62 %
Maximum heat output	65 000 BTU/h	82 000 BTU/h
EPA heat output	22 432 BTU/h	23 727 BTU/h
Nominal heat output	46 000 BTU/h	50 000 BTU/h

The s16 have a hinged door that opens with a removable key. They do not have a door handle to guarantees an unobstructed view of the flames so you fully experience that state of well-being unique to wood fires.

s[16]cube

58

68

The s16-cube offers many installation possibilities. It can be installed on the s16-cube podium set or on a custom-made piece of furniture. The precision of its finish, as well as the clean, straight lines of this model, inspire elegance and timelessness.

Podium set

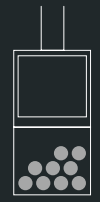

Sold separately, the s16-cube podium allows the flexibility to create arrangements that best suit any project.

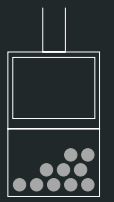

The s16 open up a world of possibilities. With the podium set or with built-in wood storage, s16 units, known for their versatility, perfectly suit all spaces.

s[16]H

58

68

The s16-H combines the s16-cube with wood storage under the appliance, making it both good-looking and practical.

Like its counterpart, the s16-cube, the s16-H is characterized by a seamless finish.

Frames

s16-Z frames have a minimalist design to suit all styles and achieve the perfect look.

Choosing an s16 guarantees an unmatched experience and focus on the essential

s[16]

[SIMPLE] No air damper to fiddle with: simply light the fire and enjoy the warmth. [EFFICIENT] Vermiculite panels line the combustion chamber, for abundant warmth that spreads quickly. [INGENIOUS] A mobile deflector activates when the door is open to evacuate any smoke fumes, preventing any significant backflow into the room. [RELIABLE] The design of the combustion chamber keeps the metal from getting distorted due to the heat and prevents disruptive sounds. [INNOVATIVE] Secondary combustion of the gases increases heat production while minimizing the release of fine particles into the atmosphere. [SOLID] Latches at the top and bottom of the door keep it from deforming and ensure an optimal seal. [CLEAN] Air sweeps the glass and carries away any dust from combustion, for a clear view of the fire. [DURABLE] The high-quality materials, precision finish and simple shape ensure its long-term performance and sustainability.
