SL211 CLAD

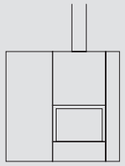

The essential fire

Available in one or two faces and in different sizes, the s21CLAD units are decorative fireplaces made up of an s21 wood-burning fireplace and unique metal cladding. One of its kind in North America, it requires a high level of manufacturing precision. Each piece is carefully crafted and takes several weeks to achieve perfection.

freestanding
double face fireplace

appliance whose installation
does not need any finishing

s[21CLAD]df2 p.15

s[21CLAD]df7 p.23

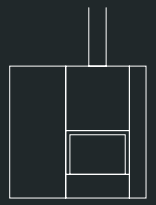

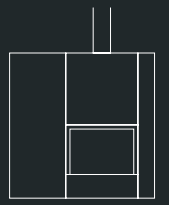

The s21CLAD is a turnkey fireplace. Unlike traditional models that need to be built into a wall, the s21CLAD does not require any finishing. The steel casing makes installation quick and easy.

Asymmetry

With log storage at the back and a combustion chamber on the other, the asymmetrical s21CLAD models add a touch of authenticity. The asymmetry allows for the fireplace to blend perfectly with the space while maintaining a minimalist design.

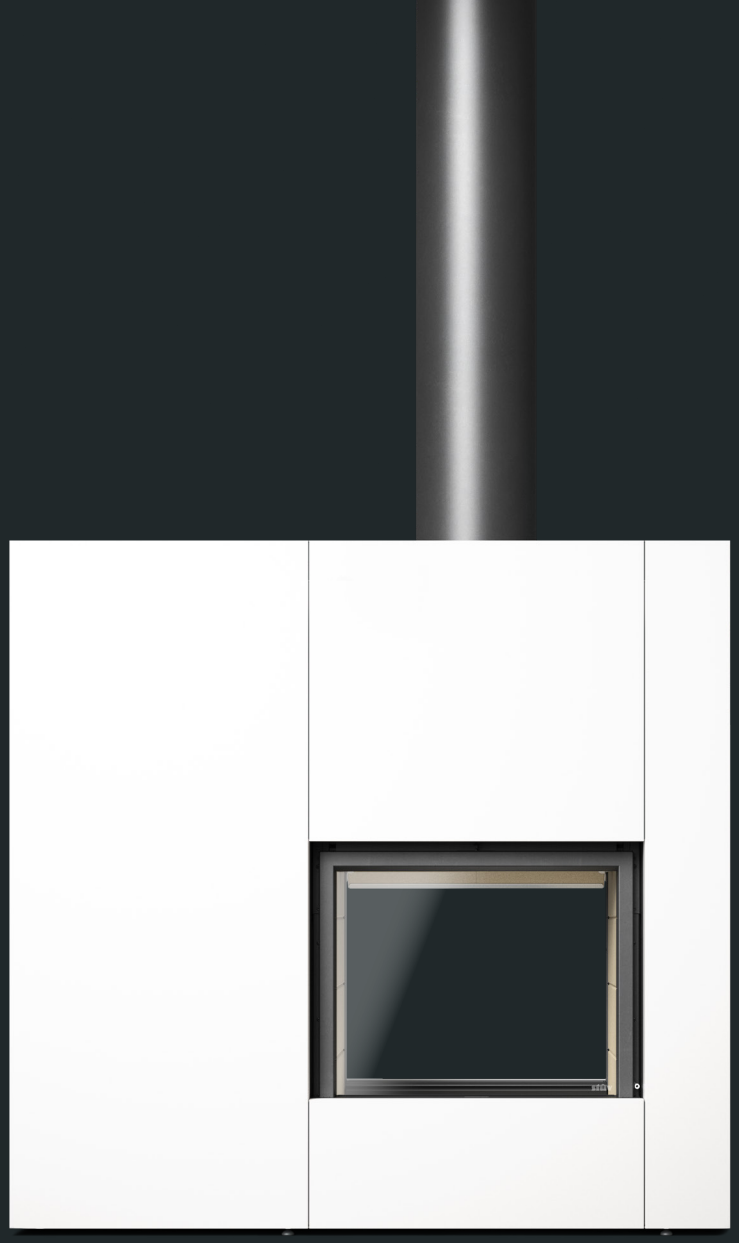

Left asymmetry

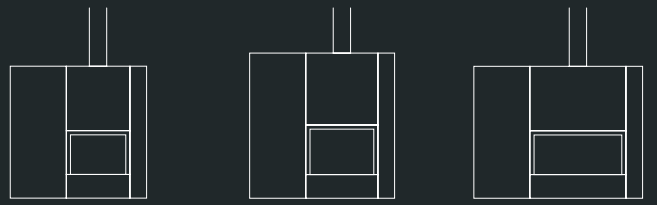

Right asymmetry

Rethinking the fireplace

The s21CLAD models have a glass window with no frame at the bottom for a full view of the fire. Mechanisms such as rails and cables are hidden for an authentic experience.

s[21CLAD]df2

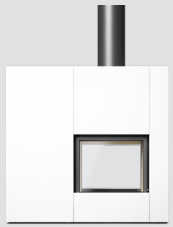

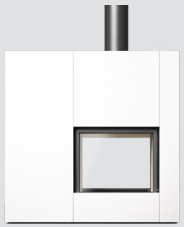

The s21CLAD-df2, like the s21CLAD-sf2 model, has a built-in convection system, is asymmetrical and includes log storage.

The two guillotine windows make it stand out. When installed in the middle of a room, this model enhances the ambiance on both sides.

Grey RAL 9007
Rust finish

Rust finish

The rust finish is created through natural oxidation of each part in a controlled environment. This process, carried out by our artisans, requires several weeks to achieve the desired result. Each rust-finished s21CLAD is a unique work of art that exudes elegance.

Log rack

Available as an option, the log rack is designed to fit into the rear of the s21CLAD-sf2 and inside the bulkhead of the s21CLAD-df2 and df7. As it supports a heavy load of wood, it is possible to store logs without the risk of damaging the cladding of the fireplace.

Guillotine fire screen

The s21CLAD guillotine fire screen lets you enjoy an open fire in complete safety. Its steel structure is incredibly strong, while the fine mesh provides a clear view of the flickering flames.

Available as an option, it can be added to all s21CLAD models, even after installation. This elegant and refined accessory is the perfect way to enhance your enjoyment of a wood fire at home.

Built-in convection system

Each s21CLAD model is equipped with a convection system whose ambient air intakes and hot air outlets are skillfully integrated into the design of the steel shell. This ingenious system helps temper the combustion chamber and distribute heat throughout the space to warm the house.

Choosing an
s21CLAD is
a statement to
your passion
for perfection

s[21CLAD]

[HYBRID] The guillotine window lets you choose between a fire for the mood or for warming up the room. [USEFUL] The steel shell turns the fireplace into a freestanding art piece. No finishing required. [CLEAN] Air sweeps the glass and carries away any dust from combustion, for a clear view of the fire. [SIMPLE] No damper to fiddle with: simply light the fire and enjoy the warmth. [INGENIOUS] When the window is fully down, the door can be tilted forward, making it easy to clean the glass and access all the mechanisms for future maintenance. [POWERFUL] The large combustion chamber and convection system spread abundant heat throughout the room. [PERFORMING] The smoke deflector is placed at the top of the combustion chamber to evacuate fumes and direct the heat to warm the space. [DURABLE] The high-quality materials, the precision of the finish and the simplicity of the shape ensure its durability.
